

Systems for Fusion: Enabling Tomorrow's Power Plants

The Challenge: *Large projects with complex technology and infrastructure*

The Solution: *Current leads, HTS wire and auxiliary systems by VESC*

Turnkey Current Leads

- Efficient, gas-cooled concept
- Industrially tested and applied
- Temperature ranges 20 to 77 K

ICE®Wire

- Composite HTS conductors
- Adaptable to your application needs
- Highly robust and reliable

The Benefits:

Simplify your project

- ✓ Reduce engineering workload
- ✓ Specify project cost and lead times = **Faster time to market**
- ✓ Reduce project complexity

Recent Projects:

Showcasing our expertise

SuprAI

Transferring 200 kA @ 20 K

ApplHy

Developing a 20 K current lead

SCARLET

Developing a current lead for hybrid pipelines
